

# GEARS COMPANY HIGHLIGHT

## SEMI-CONN NE, LLC

Veteran Thomas E Jones' company provides micro wiring custom interfaces for reliability engineering studies of processes for large semiconductor manufacturers.

The studies support analysis of micro components for different applications such as IoT (internet of things), automotive, communications, and military defense systems. Recently Semi-Conn NE became a US-based supplier to Globalfoundries US.

“

Through the GEARS program I learned an area of business which I lacked experience in - understanding my customers' needs from their standpoint - and I'm now growing my business based on those needs.
